## The Gecko

### WELCOME!

Welcome to the fourth issue of The Gecko!

There is lot's of new music a list of Christmas music, sale items and second hand music for you to look through. There are also quite few new recorders as well as good stocks of the Dolmetch plastic recorders.

### OM Recorder Course

The Orpheus Music Recorder Course is still taking enrolments so if there is any last minutes "still thinking about it" people we would love to have you.

This is a great opportunity to attend a 6-day summer course focussing on all aspects of recorder playing, ensemble, solo, chamber and recorder orchestra. This is a very intimate, individual-attention based course. You choose your own course of study selecting from a wide variety of options.

If any one has been a bit daunted by the program, feeling that it is all a bit beyond you remember that as soon as you get a tutor in front of you half the difficulty goes away.

### From the tutors:

Robyn Mellor

"Most people do not have time to practice everyday and have regular lessons. So I take the approach in my technique class "Back to Basics" to give very specific instruction on blowing, posture, and look at the music through each person's technique. How is everyone articulating? Most people can play the notes but how do you get past the notes into the music? How do we get from the notes to a musical phrase from a musical sentence to a novel? I try to look at the visual impact of the music, what is it telling us about how to approach the music, its form style format etc."

"How do we translate all this into playing the music? I have chosen a wide variety of music, some is solo and some is ensemble. This is music that I feel clearly illustrates specific techniques and approaches to music."

From Kara Ciezki

"Don't be afraid of PHI!!! In this class we will be investigating and playing arrangements of J. S. Bach's Fugues from The Well-Tempered Clavier. But to really

November 2005

understand the other factors involved with PHI ( golden section and the fibonacci series) the class will be creating shapes and portraits of objects with paints and canvas using PHI numbers to grasp the effectiveness of this natural, everyday occurrence. When these numbers of nature are seen and heard at the same time it is supposed to create an amazing brain stimulus. But the anticipated effect will only happen if the viewing measurement are correct, (ie, the golden rectangle) So who said Bach was a bit too technical?

From Ben Thorn

"The Ocarina is a great little instrument. It is a traditional vessel flute usually made of clay (though wood and plastic are also possible). While versions are found around the world, the two main types for serious music making are the "sweet potato" 10 hole Italian style, and the round 4 or 5 hole round "pendant" style. It's an instrument you really can carry in your pocket (or around your neck)."

"This course is an introduction to the 4/5 hole ocarina (though you can bring along a 10 hole one if you want) and is designed to get you playing music in several styles in unison and ensemble."

If you would like an enrolment form or have any question or enquiries please email me on [zana@orpheusmusic.com.au](mailto:zana@orpheusmusic.com.au) or visit our web site for further information and enrol online [www.orpheusmusic.com.au](http://www.orpheusmusic.com.au)
